

ITHEC conference has new Project Manager

Daniel Schäfer succeeds Dr. Hubert Borgmann

Generational change at CONGRESS BREMEN: Daniel Schäfer has been the new Project Manager of ITHEC, the International Conference on Thermoplastic Composites, since 1 July. The 42-year-old replaced Dr. Hubert Borgmann, who has retired. Borgmann was project manager of various conferences and industry trade fairs, including the "ACTUATOR" and the "RoboCup", for CONGRESS BREMEN, one of the M3B GmbH brands, for almost 24 years. "I am grateful for the many years of productive and intensive cooperation and am glad that an expert on exhibition organizing such as Daniel Schäfer is taking over the ITHEC", says Hans Peter Schneider, Managing Director of M3B GmbH.

Schäfer is familiar with the players and topics in the world of composites and lightweight construction. The experienced trade fair organizer has been working on various national and international trade fairs and conferences for 15 years. Most recently, he worked for the trade fair organizer Reed Exhibitions Deutschland as Project Manager of "Composites Europe", the "LTF-Lightweight Technologies Forum" and the "ICC-International Composites Conference" in Stuttgart and Düsseldorf. "I am very much looking forward to the ITHEC and cooperating with the team", says Schäfer, who, as the new project manager, is organizing the first virtual edition of the event, the "ITHEC 2020 – Virtual Edition". It will take place from Tuesday to Thursday, 13 to 15 October 2020.

"The online edition enables us to remain flexible both today and in the future and to achieve greater reach", says the economics graduate. "Because the ITHEC is an outstanding international event at the highest scientific level that interested parties from all over the world are participating in. With the virtual edition, we want to make it possible for them to log into the event at any time from anywhere and to communicate with participants, speakers and exhibitors with the help of efficient networking technologies."
